

The title of your report  
At most one (two-sided) page for this summary

Your name, the name of your supervisor(s) and the name of her/his team/lab

The date

### **The general context**

What is it about? Where does it come from? What is the state of the art in this area?

### **The research problem**

What is the question that you studied? Why is it important, what are the applications/consequences? Is it a new problem? If so, why are you the first researcher in the universe who consider it? If not, why did you think that you could bring an original contribution?

### **Your contribution**

What is your solution to the question described in the last paragraph?  
Be careful, do *not* give technical details, only rough ideas!  
Pay a special attention to the description of the *scientific* approach.

### **Arguments supporting its validity**

What is the evidence that your solution is a good solution? Experiments? Proofs?

Comment the robustness of your solution : how does it rely/depend on the working assumptions?

### **Summary and future work**

What is next? In which respect is your approach general? What did your contribution bring to the area? What should be done now? What is the good *next* question?
